

## A SACReD Journey Worksheet 9.3 — Asset Mapping

This activity asks us to identify assets that we can leverage in our Reproductive Justice change-making. An asset is a resource that can be used to support the goals of transformation and justice. Think beyond traditional representations of each category. For instance, financial resources could also include property, funds you could raise, in-kind style donations, etc. There are also other assets that are not financial. Relationships are assets. Area-specific expertise is an asset (think, who in your group is an expert in something related to your goals?).
